Contents

1 Introduction **1**
1.1 Mobile Robots Over the Years . . . 1
1.2 Playing a Game with Imperfect Information . . . 10
1.3 The Robot's Brain . . . 13
1.4 Big Model vs. Small Model . . . 16

2 Movable Machines **25**
2.1 Mechanical Hardware . . . 25
2.2 Kinematics of Perfect Rolling Robots . . . 29
2.2.1 Single-Wheel Drive . . . 30
2.2.2 Differential Drive . . . 35
2.2.3 Car-Like Robots . . . 38
2.3 Defining a Control System . . . 39
2.3.1 Discrete-Time Systems . . . 39
2.3.2 Kinematics as a Differential Equation . . . 41
2.3.3 From Velocity to Acceleration . . . 46
2.4 Kinematics of Misbehaving Rolling Robots . . . 48
2.4.1 Nondeterministic Control Systems . . . 50
2.4.2 Probabilistic Control Systems . . . 51

3 Sensing **55**
3.1 Sensing Hardware . . . 56
3.1.1 Observing obstacles in the robot's environment . . . 56
3.1.2 Observing the robot's state . . . 61
3.1.3 Communicating with sensors in the environment . . . 62
3.1.4 General characteristics of sensors . . . 63
3.2 Modeling Physical Phenomena . . . 67
3.2.1 A mobile robot among obstacles . . . 69
3.2.2 A bunch of bodies . . . 75
3.3 Perfect Virtual Sensors . . . 77
3.3.1 The Opposite Extremes . . . 79
3.3.2 Depth Sensors . . . 81
3.3.3 Comparing Virtual Sensors . . . 85
3.4 More Sensor Families . . . 89

3.4.1 Detection Sensors . . . 90
3.4.2 Relational Sensors . . . 93
3.4.3 Gap Sensors . . . 96
3.4.4 Field Sensors . . . 99
3.5 Sensors That Misbehave . . . 103
3.5.1 Nondeterministic Disturbance . . . 103
3.5.2 Probabilistic Disturbance . . . 105
3.6 Sensing over Time . . . 107
3.6.1 State-Time Space . . . 107
3.6.2 Time Sensors . . . 108
3.6.3 Velocities and Accelerations . . . 110
3.6.4 Sensors with Memory . . . 111

4 Simple Behaviors **115**
4.1 Memoryless Systems . . . 115
4.2 Wall Following . . . 115
4.3 Collision Avoidance . . . 115
4.4 Triangulation . . . 115
4.4.1 A general triangulation principle . . . 116
4.4.2 Handling disturbances . . . 119

5 Filtering **123**
5.1 Computing Hardware . . . 123
5.2 Simple Examples . . . 124
5.3 Nondeterministic Filters . . . 124
5.4 Combinatorial Filters . . . 124
5.5 Probabilistic Filters . . . 124
5.6 Communication: Aligning I-States . . . 124

6 Localization **125**
6.1 Exact Localization . . . 125
6.2 Combinatorial Localization . . . 125
6.3 Probabilistic Localization . . . 125

7 Mapping **127**
7.1 Map Representations . . . 127
7.2 Enhanced Sensor Mappings . . . 127
7.3 Building Geometric Maps . . . 127
7.4 Building Topological Maps . . . 127
7.5 SLAM . . . 127

8 Navigation **129**
8.1 Go to a Landmark . . . 129
8.2 Go to a Location . . . 129

8.3 Complicated Touring 129

9 More Tasks **131**
9.1 Coverage 131
9.2 Tracking a Target 131
9.3 Playing Hide and Seek 131
9.4 Manipulation 131
